When Winter Comes

The New York Herald offers the following prediction of when the winter season will begin and why:
"This year the winter season will begin in most places by November 6th. Tracing along the earth's path ahead of the advancing earth, through the very cool fall season to find a locality where the earth will be forced outward from the sun to a sufficient extent to cause wintry spells to begin we find that the brightest planet, Venus, above the sunset in the south-western sky, will be moving directly toward the earth at 4 o'clock in the afternoon November 4th.
"The repelling force of the advancing Venus will be sufficient to bump the earth outward from the sun and start increased rainfall and wintry spells of weather in most places by November 6th."

HOMESTEADS FOR THOSE IN DROUTH AREA

OTTAWA—Settlers in Saskatchewan and Alberta who have experienced crop failures are to be allowed to take up further free homesteads in other districts where the prospects for an adequate return for their labors seem more assured, under the order-in-council approved and made public. Relations under which re-entry may be made are set out in the order.

Diabetes Serum is proved a Success

PHILADELPHIA—Unqualified success of the serum remedy for diabetes, prepared by physiologists of the University of Toronto, was announced by Dr. Alfred Stengel, professor of medicine at the University of Pennsylvania. A small quantity of the serum was sent to the university here a week ago for physicians to use experimentally.

Bow Island

Mrs. Werts and Mrs. Whitney were in Maleb last week attending the W.I. Convention held there

A gathering of old timers was held in the G.W.V.A. Hall on Tuesday evening, a very large crowd gathered and spent an enjoyable evening in playing cards. Mr. E. Wilmet received first prize and Mr. Tom Ferguson the fourth prize, their refreshments were served followed by a dance, the singing of Auld Langsyne brought the evening to a close

J. Pollitt of the Bow Island Dairy has purchased from James N. Gibson of Maleb, the well known Registered Yorkshire Bull "Crusader" and invites anyone to call and see his specimen Grade heifer, a daughter of Crusader

Grand

Armistice Celebration

Under the Joint Auspices of the G. W. V. A. and Ladies Auxiliary on Friday night November 10th, at 8:30 p.m.

Talent from surrounding Districts and Medicine Hat will appear in next week's paper

Mr. Walter Walworth and Mrs. B. Whitney, accompanied by their sister Mrs. Tolan and her young son Edwin, motored to Medicine Hat last Sunday from where Mrs. Tolan started on her return journey to her own home in Montreal, after spending about three months visiting her father Mr. N. Walworth here, who are glad to report in a now much better from his illness

Winter Sports

The season for all kinds of Winter Sports is now rapidly approaching and Clubs and Associations all over the country are getting ready for these sports

It is to be hoped that at our Bow Island Curling Rink will get covered before the Freeze-Up comes, with that Rubberoid that has been on hand for some time, waiting to be put on the roof

When it is Freezing, we found that Rubberoid cracks, and an early winter has been predicted, it has been said in a few days from now, so the earlier it is put on then the easier the Rubberoid can be put on

Don't forget the Bazaar and Supper in St. Michael's Hall Saturday Oct. 28th

Everybody welcome, bring your appetite with you

C.P.R. Having Repairs Done at Pump House

The C.P.R. have some men doing repair work at their Pumphouse at the river near here, they are fixing in the new kiler that was brought here quite a while ago, that will use the natural gas as well as gasoline if it is needed

It is expected that it will only take a few days for these expert repair men to finish this job

Grain Prices

Local prices for grain here at Bow Island on Thursday 26th. October—

are as follows:

Wheat No. 1 Northern 78c per bushel

Wheat 2C.W. 31c. per bushel

Rye 40c. per bushel

Flax \$1.01 per bushel

Barley 30c. per bushel

Mr. D. Burnham caught a large coyote this week with the assistance of a bunch of dogs, after a hot chase along the road

NOTICE

NOTICE IS HEREBY GIVEN that a petition has been presented to the Council of the Town of Bow Island under the provisions of the Early Closing Act praying for the passing of the following Closing By-law:

BY-LAW NO. 1
A BY-LAW OF THE TOWN OF BOW ISLAND TO PROVIDE FOR THE EARLY CLOSING OF SHOPS IN THE SAID TOWN

WHEREAS pursuant to the Early Closing Act a petition has been presented to the Council of the Town of Bow Island signed by the occupiers of certain retail shops in the Town of Bow Island requesting the Council to pass this By-law

AND WHEREAS it appears to the Council that at least two-thirds in number of the occupiers of the shops to be affected by this By-law have signed this said petition.

AND WHEREAS due notice of the intention of the Council to pass this By-law has been given in the manner and form prescribed by The Early Closing Act and the regulations thereunder.

NOW THEREFORE THE COUNCIL OF THE TOWN OF BOW ISLAND ENACTS AS FOLLOWS:

1. That all retail shops of the following classes that is to say Grocery, Hardware, Dry Goods, Boots and Shoes, Gents Furnishings and Butcher in the Town of Bow Island shall be and remain closed on each and every Monday, Tuesday, Wednesday, Thursday and Friday from and after the hour of six o'clock in the afternoon of each of the said days until the morning of the following day and on each and every Saturday from and after the hour of ten o'clock in the afternoon.

2. That during the month of June, July and August all retail shops of the classes mentioned in paragraph one hereof in the Town of Bow Island shall be and remain closed on each and every Wednesday from and after the hour of one o'clock in the afternoon until the morning of the following day.

3. That no retail trade or business shall be carried on within the Town of Bow Island after the hours mentioned in the preceding paragraphs hereof where under the provisions of this By-law it would be unlawful at such time to keep open a shop for the purpose of carrying on any such trade or business.

4. That where several trades or businesses are carried on in the same shop and this By-law does not apply to any one or more of such businesses or trades, such shop may be kept open after the closing hours herein mentioned for the purpose of those trades or businesses not affected by this By-law, provided that provision is made so that the portion of the shop wherein the trade or business affected by this By-law is carried on is not open to the public after the closing hours herein mentioned.

NOTICE IS HEREBY FURTHER GIVEN that objections to the petition presented to the Council praying for the passing of such By-law on the ground that such petition is insufficiently signed or otherwise affecting the validity or sufficiency thereof must be filed with W. A. Bateman, Secretary-Treasurer of the Town of Bow Island on or before the 21st day of November A.D. 1922; and that if no such objections are filed before the said date the Council will forthwith proceed to pass the said Closing By-law.

W. A. Bateman
Secretary-Treasurer,
Town of Bow Island

INDEPENDENCE

THE DOMINION GOVERNMENT ANNUITIES SYSTEM

afford an unequalled opportunity for the investment of small or large amounts for the purchase of an annuity of from \$50 to \$5,000 a year for life, to begin immediately or at any future age desired, and to be paid in monthly or quarterly instalments.

Annuities may be purchased on a single life, or on the lives of two persons jointly.

After contract issued, no restriction as to residence.

Equivalents may purchase for their employees—School Boards for their teachers—Congregations for their Ministers.

Cannot be forfeited or levied upon.

No medical examination required.

Free from Dominion Income Tax.

When writing, kindly state sex, age and age last birthday.

An Old Timer--with all the vigor and all the winsome qualities of youth. Once tried, always used.

POSTUM TEA "is good tea"

Boo! helps you to "turn the corner"

Our Greatest Asset

The greatest asset of a home is not its accumulated gold, nor its area of agricultural land; nor vast mineral wealth nor great manufacturing industries; neither is the greatest of all assets to be found in military or naval power, nor even in great universities of learning and strong, industrial churches.

The greatest asset of a home is not the dwelling place no matter how fine it may be; it is not a comfortable bank account which provides a guarantee against want and assures comfort in declining years.

No, the greatest asset of a home, and of the nation which it only as strong as the homes of which it is composed, are the children. Take away the children and the home soon disappears and the nation dies.

Few, if any, people will deny the truth of these statements if faced with the necessity of making answer to them, but how many thousands and millions by their daily actions practically deny their belief in these truths? These thoughts are engendered by reading the report of the latest United States census figures which reveal the astounding and alarming fact that approximately 1,000,000 children between the ages of ten and fifteen years, out of a total of twelve million children of those ages, are engaged in work. This is child labor with a vengeance in one of the world's most highly civilized and prosperous countries, and a country which has long boasted of its great national public school system.

What does it mean to the future of the United States, and of the world, to have one out of every twelve of its children between the ages of ten and fifteen engaged in arduous occupations instead of being in school? One around United States paper, which admits that statistical figures are cold, uninteresting things, seeks to present the matter in another light. It says:

"One million underprivileged children, destined to grow to be underprivileged men and women, to recruit the ranks of the half-witted, the gunmen, the incompetent and the criminal."

"One million voters less capable of exercising the great function of the ballot because of poor equipment for reasoning power and decision."

"One million dwarfed intellects to be the easy prey of propaganda, class consciousness and hatreds. Underprivileged minds that will follow the pures of the enemy and the criminal."

"One million prospects for the I.N.W.U., the Bolshevik, and the other exponents of half-baked theories of government."

"One million people whose darkened minds will inevitably pull down the standard of art, music, drama, and life in all its ramifications."

"One million little folk, at heart innocent of all these and other dire portents for their country, with a real and true reverence against the one hundred million who permit this immeasurable loss of child labor to continue."

And this paper might have added: "One million prospective fathers and mothers of the next generation weakened, not alone in mind, but in body for the discharge of their great God-given duties and responsibilities."

Fortunately, conditions in Canada are really better and in these Western Provinces compulsory school attendance laws, rigidly enforced, operate to largely remove this dire menace. Nevertheless, cases are to be seen lacking where parents strive on one pretext or another to keep their children from school to do work about the farm or home. These short-sighted parents seem to think the immediate and rather puny labor of their children of greater value than their permanent equipment for life's work and future citizenship.

Recently, in one of these Western Canadian Provinces the school attendance law was raised by one year, but only after a rather vigorous fight, while the proposal of a further advance in order to include all children up to 16 years was rejected.

Yet surely the whole intellectual and economic life of the country would be bettered and strengthened if children were given a maximum equipment for their life's work. Our greatest asset should be encouraged and developed; not restricted and retarded.

Make Bondage a Thing of the Past!

EVERY man or woman who has come to depend upon the morning cup of tea or coffee is a slave to the use of Caffeine. Caffeine, the irritant in tea and coffee, often robs the system of the joy of living--the priceless blessing of bounding, spontaneous, natural health.

It is easy to snap the bonds and feel the surge of rich, red blood through your veins and arteries. Thousands of sufferers from the effects of caffeine have found quick and permanent relief in Instant Postum--the healthful cereal beverage made from roasted wheat.

Start TODAY. You'll find the flavor and aroma both delightful and satisfying.

Sold by grocers everywhere!

Instant Postum FOR HEALTH

"There's a Reason"

A generous sample tin of Instant Postum sent, postpaid, for 4c in stamps. Write: Canadian Postum Cereal Co., Ltd., 43 Front Street, E., Toronto. Factory: Windsor, Ontario.

When Villages Prosper

Prosperity of the Town Has a Direct Bearing On Happiness of Farm Life

No country can really prosper unless the farmers are prosperous, said Mr. Levitt, in an address to farmers the other day, and no farmers will be happy and successful unless the small villages and towns in which the farmers' families have access are highly prosperous. "Remember," said Mr. Levitt, "that you have an interest in building up towns and villages. Stick to your home remedy. Patronize your village butcher, or get friendly with your town banker--he's always glad to help and advise. Buy your furniture, your groceries, your implements in your nearest town. Every cent you spend in town remains in town. The value of your land, the ease with which you secure help, the happiness of your family, the likelihood of the boys staying on the farm--these all depend not on the farm so much as the nearby village. By increasing the prosperity of the village, you make your farm more valuable and your life more pleasant."--St. Mary's Journal.

The Man With Asthma almost longs for death to end his suffering. He sees ahead only years of endless torment with intervals of rest which are themselves fraught with never ceasing fear of renewed attacks. Let him turn to Dr. J. D. Kellogg's Asthma Remedy and know what complete relief it will give. Let him use it faithfully and he will find his asthma a thing of the past.

Civilization

What was once the lower class is gradually absorbing and identifying itself with what was once the middle class. Ultimately, as social conditions improve still further, the line will proceed to identify itself with the aristocracy. There will no longer be blue blood or green blood or yellow. The only blood that will run in our veins will be the blood of a free and competent citizen of a great democracy. We shall, in other words, have arrived at the exact position reached by Athens twenty-five hundred years ago--London Daily Express.

A GOOD MEDICINE

FOR THE BABY

Nothing can equal Baby's Own Tablets as a medicine for little ones. They are a laxative, mild but thorough action, and never fail to relieve constipation, colic, colds and simple fever. Once a mother has used them she will never doubt their efficacy. Concerning them Mrs. Saluste Pelletier, St. Dunas des Ardenes, Que., writes: "I always keep a box of Baby's Own Tablets in the house. They are the best medicine I know of for little ones and I would not be without them." The Tablets are sold by medicine dealers and by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

The statement that Panama has been worn under water is said to be incorrect.

To have the children sound and healthy is the first care of a mother. They cannot be healthy if troubled with worms. Use Mother Gravel Worm Exterminator.

Men Harnessed to Plows

Men harnessed to plows are not an uncommon sight in Morelos, Mexico, because of the scarcity of beasts of burden.

France Needs Wheat

This Year's Crop is Insufficient for Annual Requirements

France's wheat crop for 1923 is more than one-fourth short of last year's production and nearly one-third under the customary annual requirements, according to statistics issued by the Ministry of Agriculture. The crop crop is also insufficient, but oats and barley are more abundant than last year.

The wheat yield is estimated at 61,600,000 quintals, as compared with 85,000,000 last year and the country's normal requirements of 24,000,000. This is due to a reduction of 600,000 in the area planted, the small yield per acre and bad weather.

Preliminary purchases abroad already amount to 7,000,000 quintals. These were bought in Canada and the United States at less than the prices prevailing in Paris. For the last year old reserves because of the late harvest, so actually there is only eleven months to cover. It is estimated, therefore, that the shortage would have been only 21,000,000 quintals and as 7,000,000 were bought abroad, there remains needed 17,000,000 quintals.

But no difficulty is expressed as the wheat exporting countries such as Canada are believed to have a surplus of 50,000,000 quintals above the needs of Europe, where the average shortage is 15 per cent.

If You Have Neuralgia Rub On "Nervine"

Apply Nervine to the sore spot. Notice the warm glow that spreads over the influence is carried deep into the sore tissue. How quickly the pain is eased. In a little time you have forgotten it, the soreness has actually disappeared. So simple and so effective, Nervine is a boon. Large 50c bottles. Sold everywhere.

Serving One's Fellow Men

New York Lawyer Building Apartment Houses for Moderate Rental

It is easy to hear people say that there is nothing very bright in the world's skies. But the hopeful watcher will find some bows of promise--real rainbows, not moonbows. Months ago, Mr. J. M. Untermyer, the distinguished New York lawyer, declared that he would work for the construction of inventory modern tenements to house 45,000 families at a rental of \$8 or \$9 a month. To New Yorkers familiar with building costs, this seemed absurd. But the other day ground was broken for fifty such apartment houses, planned to house 2,500 families, and it is predicted that the rental Mr. Untermyer proposed will not be exceeded.

The bow of promise is not these new houses, but the fact that is demonstrated that the need of the community exists, ability of the highest order, with the object, not of becoming wealthy, but of serving one's fellow men--From the Milwaukee Journal.

India Trip Changed

Prince of Wales

London Report Says Tour Transformed Him Into "Early Middle Age"

What has the Indian tour done to the Prince of Wales?

Has it destroyed his youth?

These are the questions that all London now asks. Everyone now sees the change in the Prince since his return from his adventurous tour, and the general inquiry is whether it was worth while, after all.

From a fresh-colored, smiling eager boy the Prince has turned into a man of early middle age. All of the old light-heartedness seems to have deserted him and, wherever he appears, he looks weighed down by care.

And there is a curious apprehensive watchful glance in his eye that none of his friends like. Talking to a friend, his glance is always ahead. It is not fear, but a kind of subconscious watchfulness. He seems like a man never released from an unending strain.

Best--perhaps a happy marriage--may bring back the old ease and gaiety. But at present, the Prince looks like a man who has survived a terrible ordeal.

Where Learning Is Valued

It is the boast of the Winnipeg Board of Trade that there are more University students in Manitoba, in proportion to population, than in any other province of Quebec, or any state in the United States.

The number of places selling intoxicating liquors in London has been steadily decreasing during the past ten years.

Replenishing Forests

Benedictine Monks Plant Tree For Each One Cut

Benedictine monks for 510 years have been cultivating one of the world's finest forests. It surrounds an ancient hermitage, about fifty miles southeast of Florence, Italy. A report in an American forestry magazine says that this forest is as fine as it was nearly 1,000 years ago, though timber has been taken out of it in great quantities. The monks plant new trees as fast as they cut. Cows old ones. One forest is rapidly disappearing. Unless we want a treeless America we, too, will have to plant a tree for each one hopped. Forest destruction is our greatest waste.--Aurora Beacon-News.

Purifying of Silver

Crude silver is purified by contact with mercury, followed by distilling of the mercury, by which means the refined silver is left behind.

Some people mind their own business when they have nothing else to do.

AFTER EVERY MEAL

WIGLEYS

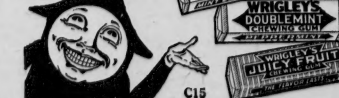

This new candy-coated gum delights young and old.

It "melts in your mouth" and the gum in the center remains to aid digestion, brighten teeth and soothe mouth and throat.

Necessity Of Ensuring The Use Of Pure Seed By Farmers Of The West

The Canadian Seed Growers' Association constitutes an organization of experienced seed growers, many of whom, not of whom desire their principal efforts toward the improvement and maintaining in their purity and productiveness the "elite" stock seeds that are produced by expert plant breeders who are for the most part employed in connection with Government Experiment Stations, both Federal and Provincial.

Seed growers who are operating under the direction of the association have come to be regarded as the important connecting link between the plant breeder and farmers in general. Without the service of our growers of registered seed, it is reasonable to conclude that much of the excellent results derived from the work of plant breeders would have been dissipated and, in consequence, farmers in general would not receive the full benefit from their work.

Therefore, local demand for registered seed absorbed a large proportion of the total quantity produced within the district where it was grown. The secretary, by means of a circular, catalogue and replies to inquiries, has been able to supply a marketing intelligence service enables seed growers to distribute their registered and other good seed.

The recent enlargement of the plan for "registration has been made possible to develop seed production centres with quite extensive acreage of seed crop under supervision of the soil and cultural practices that are particularly favorable to the kind of crop. Thus the total production of registered seed and seedlings in 1930 was 1,000,000 bushels of seed, 1,000,000 bushels of seedlings, and 1,000,000 bushels of seedlings.

Unfortunately, because of the want of proper organization, the distribution of registered seed is not satisfactory. It is this fact that to the passing of a resolution at the present annual meeting of the Canadian Seed Growers' Association recommending the formation of organizations for assembling, cleaning, storing, financing and marketing of seed. Better quality seeds of all kinds of our staple crops; and that, pending the organization of a Canadian Seed Growers' Cooperative Association, the Seed Purchasing Commission be given authority to provide a service for selling the surplus of such seed.

The constitution and charter of the Canadian Seed Growers' Association do not provide the authority necessary to enable it to enter the field of merchandising on behalf of its members. Being supported in part by the Government, it is not proper for that association to enter into competition with private companies engaged in the seed business.

The Government now has a fairly well established and experienced organization for the merchandising of seed grain. The Seed Purchasing Commission, and inasmuch as trading is not generally regarded as a proper function of a Government, it is to be expected that as soon as co-operative endeavors in the assembling and distribution of good seed have become sufficiently well developed to meet the very real needs of agriculture, particularly in the prairie provinces, the operations of the Seed Purchasing Commission may thereafter be discontinued as a Governmental institution.

equipped warehouse facilities for the assembling, cleaning and distribution of Registered and Extra No. 1 seed grain, and other seeds that may be grown in the province of Alberta in the early future there will be need for similar efficient plants for the assembling, cleaning and distribution of Registered and Extra No. 1 seed at Winnipeg, Port Arthur and Toronto. Their advantage to the seed growers and their pronounced benefits to farmers in general have been, and will continue to be, no obvious, that they may be reasonably sure of their early development at all centres where they are really needed and without the Canadian seed growers doing more than demonstrating their usefulness and the sound economy of their development and operation on the basis of seed at cost. These special seed cleaning and distribution warehouses ought not to become a public charge, and assuredly will not become a public charge unless, as frequently happens their development gains a momentum in excess of requirements, and the result of having warehouses where they ought not to be established.

Major West served with the Canadian Mounted Police and the first officer to be appointed in the Peace River district in 1902. After 20 years service with the force, retired recently on pension.

Major West has a varied career with the force, acting in many capacities during his long service. The history and traditions of the force are well known to him, and after studying medicine in London, the Major came to Canada in 1888 and immediately applied to him, and after studying medicine and surgery in the North West Territories and six years later he came to Prince Albert for the first time with the rank of hospital sergeant.

In 1906 he was appointed medical officer of the time when the Dominion Government made its treaty with the Indians in the Athabasca country and afterwards he was in charge of the R.C.M.P. in the Peace River country. During this period he was long practically out of the force, but he received mail only about once a year. Mrs. West, a niece of the late Senator T. O. Davis, and the Major is now living in British Columbia.

Edison Remedied The Trouble Made An Electric Device That Would Light A Cigar

At the banquet in New York the other night when Thomas A. Edison was presented with the freedom of the city, Richard Klob, one of the city's leading businessmen, told his table companions how he used to keep a restaurant at 164 Pearl street, where Mr. Edison was in the habit of eating lunch. After the successful experiment of forty years ago the inventor came in the next day and asked: "How were the lights, Dick?" "All right," I replied, "but they won't light a cigar. Do you know," said Mr. Klob, reciting his reminiscence, "Edison looked serious. 'That's no, said he. 'I'll have to fix that.' And three days later he brought in to me a little metal device with which my customers were enabled to light their cigars."

Cross America In A Flash The distance between the east and west coasts of the United States is 4,800 miles. It is a record by radio. That's computed from the theory, accepted by leading scientists, that radio waves travel at the speed of light, 186,000 miles a second.

The Tin Man, at Agua, is said to be the world's most celebrated man. He is built of white marble and is filled with precious stones. It cost \$10,000,000 to build and it is said that it was occupied 20 years in the building.

The stores on the Malacca, the world's largest liner, include 16,000 cups, 20,000 plates, 2,400 teapots and 1,000 tumblers.

Fast Moving Plane Can Collect Mail Bags Are Lifted By Hook Attached To Cable

The research department of the Air Ministry are experimenting with a device by which mail bags can be collected from the ground by an aeroplane travelling at full speed.

It is hoped that, before long, aeroplanes will be able to pick up the mails at intermediate stations, instead of all letters having to be sent to the central post office. Collection is made by means of a cable lowered from the aeroplane as it looms the mail station. Attached to the cable is a device which hooks the mail bags. They are then hoisted up to the aeroplane which does not need to reduce speed. Tins of petrol can be picked up in a similar fashion.

It may be possible, when the device is perfected, for aeroplanes to collect mails from the roofs of post offices.

The research department attaches considerable importance to the tests, which were carried out on a great scale, and attended with success. It is understood that more extensive experiments are to be carried out. Ordinary aeroplanes, as used for the work could be done just as easily with air liners, such as those now operating on the London route, with a single seater military machine.

Earliest Idea of Moving Pictures Englishman Has Traced Growth From Time of Confucius

The earliest idea of a moving picture was recorded in the time of Confucius, the Chinese philosopher who lived 500 years before Christ. At least this is the deduction from his studies into the question by Will Day, a well-known figure in the English film world, who has exhibited in London a number of pictures and machines tracing the growth of the moving pictures from the first primitive idea to the present form.

The "shadow shows" of the time of Confucius are the first of all recorded attempts to present animated pictures. From this early time, however, there was a long period of inactivity in development, for the next record of progressive achievement is found in 1646, when Athanasius Kircher published a book in Latin entitled "Ars Magna cum Umbris," in which a description and illustration is given of a moving picture which would have evolved with mirrors and a tall candle for illumination. Included in the collection is the original disc which Edward Wright used to settle the controversy between two American millionaires on the Ale Pulo raccourse as to whether the great act of a trotting horse were off the ground at the same time.

The experiments which Muybridge carried out to settle the controversy at the University of Pennsylvania 40,000 years, but the fact was proved that the picture is still all four feet simultaneously.

Headling through a London telephone directory, a New York man said: I find instructions to users on our pages to read the instruction reads: "Don't shout 'Hello' at the operator." It was my impression that Britons answered the phone with "Are you there?" All I have been answered with the good old American "Hello." And the operator—telephone, they call them—seems with the same salutation. The telephone service is excellent.

"Mourning postage stamps" now on sale in Germany bear the loss of the German colonies. One example shows a flag at half-mast and a wide black border.

It pays to patronize home industry. Buy from the merchants in your own town.

Stone Age Mining District Mining Carried on at Isle Royale 1,000 Years Ago

Further details concerning the uncovering at Isle Royale of what are believed to be remains of houses used by miners of the stone age, were given by William K. Ferguson, of Franklin, Pa., who was in Port Arthur while on his way home after his summer's activities.

"Isle Royale is definitely placed as a stone age mining district," he said. "Mining in progress there at least 1,000 years ago, how much longer, we don't know, but we found places six feet in diameter growing on the ancient rock stumps. I have long believed that there were villages or towns in that vicinity, and I have been hunting for three years for remains of one. This summer we found an area covering at least half a mile in width and two miles long, over the whole of which we found remains of human habitations. These were largely pits, which had been dug for houses. They ranged from eight to ten feet deep, and were protected by carefully built stone walls, which kept the fire from the water. Some of these walls had been pushed and heaved by the forests of past ages. Apparently they had been made of wood, and some of them were 20 to 40 feet in diameter, these evidently being communal dwellings. I found one 50 by 80 feet that had evidently been a fort."

"These pits had been oriented, the sides running squarely east and west and north and south, the long side being straight north and south, indicating that the people who built them perceived the relation of the stars to the sun to the direction."

"These people mined in solid rock the whole length of the island, but dug their shafts more than about 20 or perhaps 30 feet deep. Their tools were chipped, and exchanged, signs of great hardness, which are found on the shores of Black Bay, on the north shore of Lake Superior, but not on Isle Royale."

Triumph Of Modern Dentistry People Can Be Supplied With Teeth Any Shape

The manufacture of sets of jet black teeth, which are made of the way-side of British enterprise. It will be news to most people that there is a definite trade in black teeth between England and the Orient, and even necessary by the practice so popular of chewing betel nut. It is reckoned that one-tenth of the human family indulge in it, but the teeth of its voracious black as ebony. Hence, when they need artificial teeth to replace losses these teeth must be black. Examples of these are to be seen at the International Dental Exhibition, which opened recently at the Imperial Exhibition, South Kensington.

A definite side of modern dentistry is represented by these black teeth. To know it is necessary for clients to accept teeth which stand out in challenging distinction to their neighbors and proclaim their artificiality to the world. Very shabby and shabby, but the ordinary person, who is not a dentist, is not likely to notice the difference. Even teeth with make believe gold fillings are supplied.

All Kinds California and New York were arguing.

"You're always bragging about your climate," complained New York. "I wish you'd tell me what there is in it."

"No comparison," declared California scornfully. "You haven't any climate. All you have is different weather."—American Legion Weekly.

A Glimpse Of The New Canada Described By A Visitor From London

New Governor of South Australia Appointment of Sir George Bridges Reckless Remembrance of War

Major-General Sir George Bridges, who has been appointed Governor of South Australia, succeeding Lieutenant-Colonel Sir William Welsh. The latter resigned the position because he said he could not live on his salary and had not sufficient private means to afford the luxury of maintaining such a position.

His successor, Sir George, is known in the British army as the "Toy Drum Hero." That term has not been applied to him in decision, but in recognition of a memorable incident of the war in which he displayed great gallantry.

After the action at Le Cateau, in 1914, the British army started on its great fighting retreat, and men were dropping out from sheer exhaustion. Major Bridges, as he then was, went back to St. Quentin to round up 250 stragglers.

He found them in a state of collapse. At a little village shop he bought a toy drum, and telling the men into line with the toy drum and a penny whistle to serve as a band, he marched them out, laughing in spite of their weariness. They kept on marching for 21 miles.

Sir George was the military member of the Balfour mission to the United States in 1917, and head of the British War Mission to the United States in the succeeding year.

Free Speech in England Taking a Broad View of the Privilege Enjoyed Under the British Constitution

Those who follow such cases in the newspaper reports must have noted with concern the growing frequency of police prosecutions for will and malicious language. A man was charged recently at the Birmingham police court with a charge of libel against the Third, as a disturber of the peace, in consequence of his comments on the action of the judge who refused to allow Sir Henry Wilson's murderer to make a statement. When the stipendiary magistrate pointed out that it was legitimate to comment on the actions of the government, the prosecuting counsel agreed, but he stated that "they had to take into consideration the time when we lived and what was likely to be the effect of the man's remarks upon those to whom they were addressed."

There is a tendency to interpret this doctrine in a dangerously wide and a dangerously partisan sense. We are inclined to think that the British stipendiary magistrate asserted good constitutional doctrine on this occasion, and discharged his duty. We have no wish to see the old German procedure introduced into English political life, with policemen taking shorthand notes with a view to prosecutions. This spectacle is becoming too common in some English towns. This is the danger of being the public peace, and the old English dislike of such methods can find ample justification in a comparison of our experience with that of other countries. It would be no bad thing if the police authorities were made to pass an examination on Erskine May's "Constitutional History," Manchester Guardian.

Boys Used at Sea There are four different types of boys used at sea, each of which has its own uses.

There are four different types of boys used at sea, each of which has its own uses. The first is a green color, for instance, marks a wreck, while others similarly distinguish where rocks, shoals, sandbanks and deep-water channels occur.

Writing in the London Times, of which he is managing director, after a return visit to his native country, Sir Campbell Stuart has most interesting comments to make on Canadian affairs at the present time.

In the introduction to his last summer I had a faint intention to visit the great Prairie Provinces and see for myself the new Canada that had developed there since I was a boy. Ill-health prevented the realization of that wish and I had to content myself with remaining in my native Province of Quebec. I do not want it to be thought that I grumbled at having to stay there, for I would if anywhere in the world the traveller can find such peace and contentment as in the back country of French Canada. Labor difficulties are practically unknown, and the simple, picturesque, healthy life of the French-Canadian habitant always proved to me that they had learned the secret of happiness. They are the only people I have also the secret of prosperity. The Province of Quebec had a surplus this year of about \$200,000, a surplus which, while the new Canada has the Provincial Premier, is equal to the surplus of all the other provinces for the last five years.

It was a very different Canada that I once I had known. I found the same Canada, but the same public affairs than before the war. I found the consciousness of nationhood more apparent. I found a greater understanding of the fact that she needs all her brains, be they in the east or in the west, English or French. They are the same men, the same very proper wish to look after her own affairs. The important international question which interests Canada today is the appointment of a Canadian minister to Washington. The order-in-council provided that in the absence of the British Ambassador, he should be in charge of the Embassy. In my opinion the Minister will be a man of high caliber, and after the affairs of Canada, to whom he is responsible without embarrassing him in world affairs. Could not the British Ambassador of Embassy become Charge d'Affaires in the ordinary way? That Canada did want a Minister there I have no doubt. Canada's interests at Washington are enormous, and the man who is charged with their representation must be a man of the highest caliber, and the wish of the Canadian people.

What Canada needs more than any other thing is population. She needs a strong immigration policy, together with the widest possible advertisement to attract immigrants. The empty spaces are calling for settlers. She has less than three people to the square mile, while the United States has more than thirty people to the square mile. The Japanese across the border has thirty-five, and the Japanese across the Pacific have more than three hundred.

Great Britain Has All-Steel Airplane Is Less Vulnerable to Bullets and Virtually Fireproof

Great Britain possesses an all-steel bombing airplane, a distinct departure in aerial construction. Except for the canvas wings the entire machine is built of steel. Nevertheless, it is a 1 per cent. lighter than a wooden airplane of the same dimensions. The claim is made that this machine shows a great advance over German airplanes constructed of aluminum alloy, which is said to lack the strength of British steel. It is equipped with two Napier 1,500 h.p. engines, and where rocks, sand, and long-distance bombing, it is said to be as easy to manoeuvre as a little fighting scout. This is because of its steel construction, which permits the grouping of all weights.

It is claimed that all-steel airplanes are greater strength, increased load-carrying capacity, ease of manufacturing in large numbers, and the fact that they are less vulnerable to bullets and shrapnel while flying, and also that they are virtually fireproof.

War Wastes The U.S. fleet of wooden ships built during the war at a cost of \$200,000,000, was sold recently for \$750,000. And the ships were useless. But this example of war waste is not so bad as the American war record in aviation. More than \$400,000,000 was spent on the production of air machines, and not an American air machine was used in the war.—Hamilton Herald.

In Japan a species of mulberry often is grown for its bark used in paper making.

AN IMPORTANT PASSENGER WAITING AT THAT ISOLATED STATION.

The Man Who Works Hard Should Follow This Advice

Perseverance and will power he should have, but whether he has strength and vigor to sustain them. Hard working men often have headaches and suffer from biliousness. The occasional use of Dr. H. H. Harrison's Pills keeps a man feeling fit and lively, keeps him always at his best. Headaches, indigestion, poor color are quickly remedied by Dr. H. H. Harrison's Pills. Hamilton's Pills keep the system clean and pure, tone up the blood, drive away tiredness and lassitude. No medicine for men is better than Dr. H. H. Harrison's Pills, 25c. at all Dealers or The Caltabonico Co., Montreal.

Bar B Ranch,

September 12th, 19—

I went to church on Sunday, for the first time since I left Winnipeg. It was a beautiful morning, and at breakfast Mrs. Blingham mentioned that she should all go to evening service at the Indian Mission on the Reserve, twelve miles away. Five other ladies here I have wished to visit the service, so I was greatly pleased that Mrs. Blingham and Mrs. Livingston should go with me.

We had lunch early, for we wished to be at the Mission in time to call on some of the Indian celebrities before tea, as the service was directly afterwards.

Halfway between the Bar B and the Mission we came to a "dividend" and I got out to see it, with Mrs. Livingston as showman. I don't suppose you know what a "dividend" is, so I shall describe it as best I can.

At first I thought that the wooden structure I saw was a bridge. It certainly looked like one, but was a bridge over dry land! And why build it so narrow? To add to my mystification, when I reached the end of the sloping approach I found myself looking down into a narrow pool of water.

Mrs. Livingston evidently enjoyed my astonishment. I believe he would have enjoyed it even had I fallen into the water—and after waiting in vain for me to speak and display my ignorance, he told me quite seriously that most of the Bar B cattle were shipped to England, and that the British authorities would not allow them to land until assured that they had been given a bath! "I refused to laugh, so he finally told me that ranchers were compelled by law to dip their cattle in an antiseptic solution before shipping them, this to prevent the spread of mange or other skin diseases. The cattle are driven up the approach, and when they come to the water there is a tank for them to do so but get into it; both approach and reservoir are too narrow for them to turn in. There is a gradually sloping floor in the reservoir, and before they know what is happening they are in the water and are then forced to swim. In this way the chemicals are distributed over all but their heads. Quite clever, is it not? And wouldn't it be a perfectly lovely way to bathe refractory small boys?

A hill around which the road winds led us from the Mission until we were within half a mile of the ranch. To my surprise, the many buildings connected with the Agency and the Mission made a good-sized village, and I was not

at all surprised to find that the largest of the Mission buildings is the school. It would need to be large to accommodate nearly a hundred children in attendance.

An "real Indian" the children were rather disappointing. The boys were smart dark blue uniforms. The girls, too, are all dressed alike, though not to as good advantage as the boys; but the feminine love of adornment finds expression in hair-ribbons of every color of the rainbow and a few never seen in any rainbow. The girls are not at all pretty, but they have very sweet voices, and a half-mannered child is altogether charming.

All the children go to school half of each day. During the other half-day the boys are taught carpentering and farming, and the girls learn to cook and sew and "keep house" generally. They are generally as healthy happy children could well be.

A deaconess with a sanctimonious way of talking and an unattractive way of looking at Mrs. Livingston, showed us to school. I detest good-looking people. She is young and good-looking, but I suspect her enthusiasm for me of some use to suffering humanity is beginning to grow cold. But I really do not think that she should waste her arts on Mrs. Livingston; she is exactly the sort of man to be taken in by the pouting type of girl. Of course one never knows; he may like to be stirred away from his rutted rut by the wrong way until I felt like contradicting everything he said. Of course one never knows what had been my own opinion a moment before.

One outside again we walked around the gardens and looked at the outside of the other buildings. They of course, being closed for the day.

The first elderly woman I met was Mrs. Prince of Wales. She had an older sister named Mrs. Prince of Wales. She was the same age as the late King Edward, she changed her name to Mrs. Prince of Wales. With her son and his wife and children she

Concerning a Terror Inspiring Moth

HAVE you ever seen a human skull? It is not, I admit, an attractive sight, but it is a very interesting one. I have seen a skull of a creature that you tell you to call a lovely little creature that even though it has a very clearly drawn likeness of a skull, it is not a skull at all. It is a skull of a creature that is so lovely, so happy and beautiful, and all that in spite of its being The Death's Head Hawk Moth.

I know a little boy who was sitting up quite late one night studying his lesson, as he wanted to be the best in his class for the examination. It was late spring when exciting lessons such as examinations occur in school. It also was quite a warm evening, so that the windows were open and the boy was grateful for the breeze that blew in from the garden.

Suddenly something else blew, or, I should say, flew, in with such a loud whirling of wings that the boy was startled. He jumped up, with no thought for his lesson, but quite intent on what he at first thought was a bat, but it was something else now here, now there against the ceiling and walls. Finally it was caught, and the boy was so amazed and delighted that, very gently holding it in his careful hands, he ran to show it to his father.

It was a Death's Head Hawk Moth, but they didn't know that. To them it was merely a terrible thing, for want, there a distinct skull outlined about it!

The little boy's aunt burst into tears, his mother seemed anxious and even his father, who as a rule was a most sensible person, looked slightly uncomfortable, while the aunt began to sob and wailed that it was an awful sign of misfortune or death. She was all for killing it, but the boy ran back to his room and carefully laid the Moth out of the open window back into the velvet black of the night. He found that it was returning to its history, he first opened another book, one about Moths and Butterflies. After reading a few of the interesting pages he found an exact copy of his little friend!

He returned to his history. But no mistake! He found the boy or on his frightened family. On the contrary, they were very happy and particularly so was the boy on account of his little friend. The next evening he hoped his Hawk Moth friend would again flutter through the window toward his room, but this Moth is quite rare. It never comes back, so I was greatly pleased to see it ever so many others—all colors.

A few days later, the boy's father looked them up in his book and learned all about them before releasing them back to the darkness. This boy later became a great naturalist; just because a wonderfully tinted Moth flew to him.

The Hawk Moth or Sphinx family is a very large class of which there are many different kinds, the best known of which are the Papilio Hawk Moth, the Pieris Hawk Moth, and the little Erebidae Hawk Moth. The Hawk Moth, and last and largest, the Death's Head. This one is seldom seen and only flies at night. It is protected during daylight by cleverly choosing a resting place that is like its own coloring.

It is not a very common sight. The young of this Moth, which are like before, resembling their parents, are very beautiful. They are lemon green, with seven swirling purple yellow spots on each wing, and a few small black spots on the hind wings. Several inches down to the soil when they instead spinning the cocoon, where they remain for several months before returning to the world as Moths.

Copyright, 1922.

greater surprise, a very picturesque one. They are situated in a deep, shallow hollow amidst the hills, are all white, and are surrounded by a ring of all-are surrounded by trees and gardens.

We were directly to the residence of the Indian Agent. His wife, a friendly little woman of forty or so, met us with a hearty welcome. Livestock Receipts At The Leading Markets

Heavy Increase Shown In Western Shipments of Livestock

According to the Dominion Livestock Branch weekly report, some of the principal livestock markets of the Dominion show considerable decrease in cattle receipts from the first of the year to early in September, as compared with the receipts during the same period of last year. The import of yearlings at St. Boniface, Manitoba, however, has increased, the numbers marketed during the present year to date as compared with last year being greater by 2,000 head, when compared with offerings of the same period of 1921.

The increase in cattle marketings in the western provinces are duplicated by the calf, sheep and hog marketings and more than offset any decreases in marketings in the eastern provinces.

The result is that the combined receipts at all yards in the Dominion are in every class in excess of those of the same period of last year. The Toronto and Montreal markets are behind in cattle receipts, Montreal is off in calves and Toronto in sheep, but the combined receipts to September 7th at Toronto, Montreal, Winnipeg, Calgary and Edmonton, as compared with the receipts for the same period last year are: 451,597 cattle, against 377,620; 156,416 calves, against 125,072; 23,487 hogs, against 23,477; and 23,487 sheep, against 23,461.

Top prices on September 14th show a rise on top hundredweight live steer on cattle than on the same date of 1921, appearing at Calgary where the market was to be the steepest. Cows showed a relatively sharp decrease.

Hogs were higher at Toronto and Montreal but lower at Winnipeg, Calgary and Edmonton. The prices on choice sheep and lambs were higher at all markets excepting Winnipeg, where the quotations for lambs were on a tonweight basis.

Top prices on September 14th show a rise on top hundredweight live steer on cattle than on the same date of 1921, appearing at Calgary where the market was to be the steepest. Cows showed a relatively sharp decrease.

Refuses a Pension

Lord Strathclyde Voluntarily Relinquishes Aspired Income of 3,750 Pounds

Lord Strathclyde has astonished the official world by voluntarily relinquishing the pension of £3,750 a year that was granted him seven years ago when he retired from the office of Lord Advocate for Scotland, where he was getting £5,000 a year.

He is 64 years old and declares his reason for giving up the pension is that he is unable, owing to weak health, to take part in the judicial work of the House of Lords. That has only increased the surprise, his action has occasioned. Such an exhibition of public spirit is rare in Scotland.

The British Government makes generous provision for the future welfare of its best-paid officeholders when they join the ranks of those who have retired. The speaker of the House of Commons has a salary of £5,000 a year; he may retire whenever he wants to and enjoy a life pension of £4,000 a year. The Lord Chancellor, who fills a role in the House of Lords, is the speaker of the House of Commons, receives a salary of £10,000 a year and retired pay of £5,000.

OIL LIGHT BEATS
ELECTRIC OR GAS

BURNS 94% AIR

A new oil lamp that gives an amazingly brilliant, soft, white light, even better than gas or electricity, has been tested by the U.S. Government and 25 leading universities and found to be superior to 13 ordinary oil lamps. It burns without odor, smoke or noise—no pumping up, no soot, no flicker, and Burns 94 per cent. air and 6 per cent. kerosene (coal-oil).

The inventor, T. V. Johnson, 673 McDermott Ave., Winnipeg, is offering a lamp on 10 days of \$2.95 cash, or even to give one FREE to the first user in each locality who will help him introduce it. Write him today for full particulars. Also ask him to explain how you can get the agency, and without experience or money make \$250 to \$500 per month.

WORLD HAPPENINGS
BRIEFLY TOLD

The Government of India has requested all restrictions on the export of wheat and other grains which have been enforced since 1915.

On Oct. 3 the Parliament at Dublin passed by a large majority the clause of the new Irish constitution closing the out of alliance.

All possible co-operation will be given by the Provincial Government in the settling of prospective Dutch farmers in Alberta.

Members on the Vancouver Trades and Labor Council unanimously passed a resolution calling upon the Trades and Labor Congress of Canada to adopt an attitude of opposition to war.

The Cabinet has authorized the Italian delegation to the Geneva conference to accept the proposal before the League of Nations regarding a loan to Austria, this signifying Italy's participation in the loan.

Two fishermen of Big Barabach, Pleasant Bay, Newfoundland, claim to have discovered the submerged hull of the Cape Breton steamer Morien, which left Louisbourg on Nov. 16, 1912, and was never heard of afterward.

Long distance telephone connection between Edmonton and Winnipeg is now within measurable sight. It is reported by the Alberta Telephone Department. Apparatus has been ordered and is expected to be ready for delivery in about two months.

Hon. Charles Murphy, Postmaster General, received the first parcel sent C.O.D. by the service inaugurated recently. It was a large basket of roses, the gift of the conferees of Dominion Postal Officials. The carrier, in delivering the parcel, graciously collected 7 cents from Mr. Murphy to cover the presumed cost.

BEAUTY OF THE SKIN

Is the natural desire of every woman. It is obtainable by the use of Dr. Chase's Ointment. Pimples, blackheads, freckles and redness of the face, itching and eruptions of the skin, are all cured by the use of Dr. Chase's Ointment. Sample free if you write.

Ointment

Canada-U.S. Treaty Ready

Provides for Control of Lake of the Woods Levels

The proposed treaty between the United States and Canada providing for control of the levels of the Lake of the Woods will be all probability be signed to include Ripley River and Hazy Lake, as a result of the round table conference between representatives of the two interested groups held at Ottawa in the Prime Minister's office recently.

The conference has been adjourned until November 15, when it is hoped final arrangements for settlement of the difficulties will be made.

At the conclusion of the conference the Prime Minister intimated that a tentative treaty had been drafted, which he thought would satisfy all those interested.

THAT DRY COUGH
IS BRONCHITIS

If neglected, it will weaken the lungs and prevent recovery. Cough Nothing easier to help you quickly than the action of a good cough medicine. Its action is to loosen the congested spot is healed, irritation is soothed away, phlegm and secretion are cleaned out, all symptoms of weak throat, Catarrh, whooping cough, Croup, etc., are cured. Sold everywhere in three sizes, 25c, 50c and one dollar for a complete two month treatment. Prepared by the Carlsberg Co., Montreal.

315,000 Visitors Saw The Passion Play

Some 315,000 visitors witnessed the Passion Play this season. The gross receipts of the play itself were some 20,000,000 marks, the sale of books and souvenirs netting another 4,000,000 marks. In addition, other millions were spent in the village shops and restaurants.

Do not allow worms to sap the vitality of your children. If not attended to, worms may work terrible harm to the constitution of the infant. The little worms cannot voice their complaint, but there are many signs by which mother can be aware that the child is infested with worms. It is necessary. These powders act quickly and will expel worms from the system without any inconvenience to the child.

Dairy Products From
Canada to Britain

Canada Exported 1,646 Tons of Butter and 58,674 Tons of Cheese

Statistics published in the News Letter of the Dominion Dairy and Cold Storage Branch show that Canada exported to Britain during the year ended June 30th last, 1,646 tons of butter and 58,674 tons of cheese. Exports of butter to the Mother Country from Australia, New Zealand, Denmark and the Argentine all exceed Canada's exports in quantity, but New Zealand alone exceeds our exports in value. In the month of July, this year, Canada's exports of butter to the United Kingdom were 1,164 tons, hundredweights compared with 2,317 hundredweights in the corresponding month last year and 307 hundredweight the year before. The export of cheese fell off considerably, being 129,368 hundredweight compared with 214,568 hundredweight in July last year.

Why Travel?

"You've been to Bangkok?"
"Yes."
"It must be a quaint city. What did you see there?"
"Well, there was a pretty good Chaplin film at one of the movie houses."—Birmingham Age-Herald.

Lions Called Affectionate

Trainers say the lion is the only wild animal that is capable of affection.

Burdett News

From our own Correspondent

Mr. Adolph of Long Beach, California is in town to look after his business interests here.

The Women's Institute held a social evening in the United Church on Friday last and a very pleasant evening was passed.

On Sunday last, being Missionary Sunday, the Rev. P. Johnson gave a rousing appeal for Foreign Missions, mentioning some of the atrocities that are being enacted in the Near East under the name of religion. It does us good to hear of such things and if it does not loosen our purse strings it should make us more content to live in Canada where every man can worship as seems best to himself.

Mrs. C. Goroboul was a business visitor to Lethbridge on Tuesday.

Mrs. A. H. Rygg is visiting her parents in Magoth.

Mr. and Mrs. J. E. Lynde who have been living in town the past year moved out to the farm on Wednesday.

Wedding Bells

The community was given a surprise last week when Mr. Snyen (shorts) and Miss Martha Slivick returned from Lethbridge together and announced their marriage. Both the young couple are well known in these parts, Martha being a nurse made her self very useful during the Flu epidemic and many people will never forget her kindness, we all wish them very much happiness.

Nearly a Fatal Accident

Mr. Geo. Thacker met with an accident last week which might have been fatal, while raising a windmill the prop-shaft and let it fall, Mr. Thacker being underneath, the only thing that saved his life was the fact that there was a log near and the nail fell on it relieving the pressure on his body, as it was he received several nasty wounds on his face and hands.

Epidemic of Chicken

Stealing

There is a regular epidemic of chicken stealing these days and the usual accompaniment of Talk, it is a mean thing to do and whoever is the culprit should be punished. But one should be careful how they throw suspicion on anyone unless they are absolutely certain, since they might harm an innocent person but if they can prove their statements then in the name of Justice they should prosecute.

Male News

Mr. R. B. Rensen who has been in the Medicine Hat Hospital for some time, returned home on the 1 o'clock train Monday morning and is feeling some better although not very strong yet.

The next U. F. W. A. meeting is to be held at the home of Mrs. Tweedie on the 9th, November.

New Policy Aims To Keep Settlers in Western Canada: Give Homesteads

EDMONTON, — Ottawa will assist in the migration of Farmers from the drought areas in Southern Alberta to new homes in northern areas, according to Hon. Charles Stewart, minister of the interior, who said a flying visit to Edmonton last week, Mr. Stewart, after a conference with Premier Greenfield, announced that it was the intention of the federal government to introduce legislation at the next session of parliament granting extra homesteads to these farmers who have been unable to make good through drought on conditions over which they have no control.

Co-operation by the provincial authorities will be required, states Mr. Stewart, for once authority is granted to grant the extra homestead the provincial government will be asked to recommend those farmers who will be granted this privilege. In the past, the provincial government has made every effort with the assistance of the Dominion authorities and the railways, to prevent the exodus of

farmers who have lost everything they had to machinery and loan companies. In nearly every case where a move had been made, it is stated the farmer had left Canada. While millions are being spent on irrigation projects in the south, it is realized that immediate benefit will be felt only by a few and a farmer in a dry area who has lost everything cannot wait even for a year or two for the irrigation ditches to come his way. With the offer of an extra homestead in districts that are assured of moisture and at least fair crops every year it is felt that these farmers could be induced to stay in Canada and the country thus retain men of the type now being sought as immigrants—men who are good farmers and accustomed to conditions in Canada.

It is expected that a plan will be also worked out by the provincial authorities whereby their farmers would be given transportation to their new homesteads and would be assisted in establishing their new homes.

According to Mr. Stewart, there are a great many farmers in Southern Alberta who are anxious to move and start again in a locality where crop conditions are more stable.
